

# Index to volume 28 (1988)

## Articles (titles in italics refer to Research and technical notes)

### January (pp 1-64)

- Increase in critical current density of Y-Ba-Cu-O compounds at 77 K by addition of fluorine  
F. Sumiyoshi, T. Hamada and S. Kawabata 3-6
- Electrical and mechanical properties of lead/tin solders and splices for superconducting cables  
R.W. Fast, W.W. Craddock, M. Kobayashi and M.T. Mruzek 7-9
- Cryogenic wind tunnel research: a global perspective  
D.A. Dress and R.A. Kilgore 10-21
- Vapour-liquid equilibrium of nitrogen-oxygen mixtures and air at high pressure  
J.C. Rainwater and R.T. Jacobsen 22-31
- Cryogenic UHF FET oscillator for magnetic resonance detection  
S.I. Cho and N.S. Sullivan 32-35
- Thermodynamic analysis of the Stirling cycle  
P.R. Taylor and K.G. Narayankhedkar 36-45
- Superconducting electronics: current status and future prospects  
M. Nisenoff 47-56

### February (pp 65-148)

- Liquid helium servicing from the space station  
S.R. Breon 68-76
- Superfluid Helium On-Orbit Transfer Flight Experiment: performance estimates  
M.J. DiPirro 77-80
- Analytical study of He II flow characteristics in the SHOOT transfer line  
J.H. Lee, Y.S. Ng and W.F. Brooks 81-85
- Dewar to dewar model for superfluid helium transfer  
H.A. Snyder 86-89
- Mechanical pumps for superfluid helium transfer in space  
M.G. Izenson and W.L. Swift 90-95
- Cavitation characteristics of a small centrifugal pump in He I and He II  
P.R. Ludtke and D.E. Daney 96-100
- Turbulent flow pressure drop in various He II transfer system components  
P.L. Walstrom, J.G. Weisend II, J.R. Maddocks and S.W. Van Sciver 101-109
- Slip effects associated with Knudsen transport phenomena in porous media  
T.H.K. Frederking, W.A. Hepler and P.K. Khandhar 110-114
- Integrated fountain effect pump device for fluid management at low gravity  
S.W.K. Yuan and D.J. Frank 115-119
- Liquid/vapour phase separation in <sup>4</sup>He using electric fields

- U.E. Israelsson, H.W. Jackson and D. Petrac 120-125
- Enclosed capillary device for low gravity management of He II  
D.J. Frank and S.W.K. Yuan 126-131
- Cavitation in flowing superfluid helium  
D.E. Daney 132-136
- Long-term performance of the passive thermal control systems of the IRAS spacecraft  
P.V. Mason 137-141
- Novel approach to supercritical helium flight cryostat support structures  
J.F. Maguire, J.D. Ramsden and D.E. Wolman 142-146

### March (pp 149-212)

- Joule-Thomson effect and internal convection heat transfer in turbulent He II flow  
P.L. Walstrom 151-156
- Performance of a liquid helium centrifugal pump for the TOPAZ superconducting magnet  
T. Haruyama, T. Mito, A. Yamamoto, Y. Doi, K. Matsumoto and H. Kajiwarra 157-160
- Kapitza resistance of zinc below 1 K  
U. Schulz and R. Tidecks 161-163
- Small low-cost platinum resistance thermometers for thermometry in magnetic fields  
Y. Iye 164-168
- Analysis and performance prediction of electromagnetically-driven free displacer Stirling cryocooler  
P.R. Taylor and K.G. Narayankhedkar 169-176
- Thermal effects due to oscillations of gas columns  
Y. Narahara, A. Tominaga, F. Mizutani and T. Yazaki 177-180
- Technique for short sample testing of high T<sub>c</sub> superconducting wire*  
L. Cowey, H. Jones and D. Dew-Hughes 181-182
- Improved soldered joints of technical current-carrying superconductors*  
I.N. Goncharov and L. Miu 183-184
- Simple and reliable liquid nitrogen refill system*  
J.J. Noijen, G.W.M. Baselmans and K. Kopinga 185-187

### April (pp 213-300)

- Overview of advanced fibre composites  
G. Hartwig 216-219
- Fibre composites in satellites  
A. Schedler 220-223
- Tunneling in amorphous solids  
S. Hunklinger 224-229
- Slow mechanical relaxations of polymethacrylates below 20 K  
W. Hickel and G. Kasper 230-233
- Mechanical relaxation of polymers at low temperatures  
K. Ahlborn 234-239

- Pressure-induced optical shifts and compressibilities of polymers doped with dye molecules  
Th. Sesselmann, W. Richter and D. Haarer 240-242
- Low temperature thermal conductivity of polymers  
D. Greig 243-247
- Thermal expansion of polymers from 4.2 K to room temperature  
G. Schwarz 248-254
- Thermal expansion of fibre composites  
G. Hartwig 255-266
- Fatigue behaviour of carbon fibre reinforced plastic at cryogenic temperatures  
K. Ahlborn 267-272
- Cryogenic mechanical behaviour of a thick-walled carbon fibre reinforced plastic structure  
K. Ahlborn and S. Knaak 273-277
- Damage development in composite laminates with brittle matrix in fatigue loading  
G. Maier and H. Ott 278-280
- Aspects of the bonding and insulation of a large superconducting solenoid  
D. Evans and J.T. Morgan 281-282
- Gas permeability through composite materials  
D. Evans and J.T. Morgan 283-284
- Gas permeation and performance of a fibre reinforced plastic cryostat  
S. Nishijima, T. Okada, K. Fujioka and Y. Kuraoka 285-287

### May (pp 301-364)

- Electromagnetic shielding properties of yttrium barium cuprate superconductor  
J.C. Macfarlane, R. Driver, R.B. Roberts and E.C. Horrigan 303-305
- Superconducting properties of multifilamentary V<sub>3</sub>Ga wires containing additions of indium  
A. Gladun, G. Fuchs, K. Fischer, C. Frenzel and W. Holzhaeuser 306-311
- Mechanical investigation of fibre reinforced materials for superconducting poloidal field coil design  
A. Nylas and U. Jeske 312-316
- Experimental investigations of superinsulation models equipped with carbon paper  
W. Barth and W. Lehmann 317-320
- High field magnetocalorimetry below 1 K: specific heat of copper at 14 T  
E.I. Leyarovski, L.N. Leyarovsky, Chr. Popov and O. Popov 321-335
- Operational characteristics of a CMOS microprocessor system at cryogenic temperatures  
M.J. Deen, C.Y. Chan and N. Fong 336-338

### June (pp 365-436)

- Measurement of characteristic currents in stabilized superconductors  
V.A. Altov, A.A. Akhmetov and V.V. Sytchev 370-373

## Index

- Resistive state of inhomogeneous superconducting composites  
S. Takács 374-380
- Feasibility study on a large-scale, high current density superconductor by dynamic stabilization. Part 3: coil design and quench analysis  
T. Ogasawara and T. Noguchi 381-385
- Losses in transformer-like coils wound from a very fine filament Nb-Ti superconductor  
L. Cesnak, S. Takács, F. Gömöry and I. Hlásnik 386-393
- Silicon junction field effect transistors at 4.2 K  
W. Nawrocki 394-397
- Vapour-liquid equilibrium in the ternary mixtures  $N_2$ - $CH_4$ - $C_3H_8$  and  $CH_4$ - $C_2H_6$ - $C_3H_8$   
G. Trapppehl and H. Knapp 398-405
- Fouling phenomena during boiling of cryogenic liquids  
H. Müller-Steinhagen 406-408
- Proximity effect and high  $T_c$  superconductivity  
V.Z. Kresin 409-411
- July (pp 437-508)**
- Cryogenics at the University of Southampton: a review  
Edited by R.G. Scurlock 439-466
- August (pp 509-572)**
- Discontinuous deformation during load- and displacement-controlled tensile tests and optical observation in liquid helium  
T. Ogata, K. Ishikawa, O. Umezawa and T. Yuri 511-515
- Development of a practical pulse tube refrigerator: co-axial designs and the influence of viscosity  
R.N. Richardson 516-520
- New method to determine the BWR coefficients in saturated regions  
T. Asami 521-526
- Superconductor-semiconductor hybrid devices, circuits and systems  
T. Van Duzer 527-531
- September (pp 573-636)**
- Superconducting critical current densities and flux trapping in sintered YBaCuO  
K. Itoh, H. Wada, T. Kuroda, Y. Kaieda, O. Odawara and T. Oie 575-579
- Superconductivity and transformation of near-equiatomic M-Ru ( $M = V, Nb$  and Ta) alloys  
T. Tsukamoto, K. Koyama, A. Oota and S. Noguchi 580-584
- Transient heat transfer into a closed small volume of liquid or supercritical helium  
C. Schmidt 585-598
- Continuous process for the separation of Ne-He mixtures at 80 K  
E.I. Leyarovski, J.K. Georgiev, B.V. Nikolov and A.L. Zahariev 599-604
- Measurement of magnetic field induced changes in the entropy of europium sulphide  
P. Bredy and P. Seyfert 605-606
- Test results for a high quality industrial superinsulation  
W. Barth, W. Lehmann, C. Henry and R. Walther 607-609
- Thermal diffusivity of Araldite  
D.E. Tsatis 609-610
- Demountable charcoal adsorption pump for  $^3He$  evaporator  
F. Guillon 610-612
- Rubber band suspension for a nuclear demagnetization cryostat  
K. Uhlig and W. Hehn 612-614
- New possibility of magnetic ripple shielding for specific heat measurements in hybrid magnets  
Z. Tarnawski, H.P. van der Meulen, J.J.M. Franse, K. Kadowaki, P.A. Veenhuizen and J.C.P. Klaasse 614-616
- October (pp 637-708)**
- Relation of critical current irreversibility to trapped flux and microstructure in polycrystalline  $YBa_2Cu_3O_7$   
J.E. Evetts and B.A. Glowacki 641-649
- Investigation of inter- and intragrain critical currents in high  $T_c$  ceramic superconductors  
H. Küper, I. Apfelstedt, R. Flükiger, C. Keller, R. Meier-Hirmer, B. Runtsch, A. Turowski, U. Wiech and T. Wolf 650-660
- Critical currents of power-based superconducting wires  
P. Dubots and J. Cave 661-667
- Role of weak links in the critical properties of ceramic superconductors  
G.B. Donaldson 668-670
- Influence of twinning and grain structure on the critical current density of  $YBa_2Cu_3O_{7-x}$   
S. Iwama, P.J. King, D.S. Misra, W.B. Roys, D.N. Matthews and K.N.R. Taylor 671-673
- Model for flux creep in high  $T_c$  superconductors  
D. Dew-Hughes 674-677
- Effect of particle size on the magnetization of high  $T_c$  powders  
A.D. Hibbs, F.J. Eberhardt, A.M. Campbell and S. Maler 678-680
- Flux trapping and magnetization of hollow superconducting cylinders  
F.J. Eberhardt, A.D. Hibbs and A.M. Campbell 681-684
- Critical and supercritical current measurements by a magnetic induction method  
E.A. Harris, J.E.L. Bishop, R.L. Havill and P.J. Ward 685-687
- Magnetic measurements of critical currents in high  $T_c$  superconductors  
F. Ferguson, K. O'Grady, A. Briggs and I.A. Denton 688-690
- Novel form of magnetometer using high temperature superconductors  
J.C. Gallop, S. Lilleyman, C.D. Langham, W.J. Radcliffe, M. Gee and M. Stewart 691-693
- Resistive measurements in the inter- and intragrain critical current properties in  $YBa_2Cu_3O_{7-x}/Fe$   
R. Wördenweber, K. Heinemann and H.C. Freyhardt 694-698
- November (pp 709-796)**
- New research opportunities in superconductivity  
D.J. Scalapino, D.R. Clarke, J. Clarke, R.E. Schwall, A.F. Clark and D.K. Finnemore 711-723
- Design considerations for high  $T_c$  ceramic superconductors  
E.W. Collings 724-733
- Low resistivity contacts to  $YBa_2Cu_3O_{7-x}$  superconductors using  $Ag_2O$  powder  
S. Yokoyama, T. Yamada, Y. Kubo, K. Egawa and Y. Simizu 734-736
- Current ripple effect on superconductive d.c. critical current measurements  
L.F. Goodrich and S.L. Bray 737-743
- Optimization method for superconducting magnet current leads  
K. Maehata, J. Ishibashi, M. Wake, A. Katase and M. Kobayashi 744-750
- Cryogenic conceptions for full superconducting generators: realization of superconducting armature cryostat  
Y. Brunet, P. Tixador and H. Nithart 751-755
- Stability of superconducting composites under thermal disturbances with change in the external magnetic field and the critical temperature of the superconductor  
V.R. Romanovskii 756-761
- Analytical network model on the flow and thermal characteristics of cyclic flow cryogenic regenerators  
Xiao Jia Jua and Guo Fang Zhong 762-769
- Molecular and thermodynamic method of heat transfer generalization and classification of boiling substances  
I.P. Vishnev 770-778
- Hybrid liquid helium cryostat for radio astronomy use  
B.N. Ellison 779-782
- High resolution single channel neuromagnetometry and minimal approach for multichannel systems  
T. Thomas and D. Duret 783-795
- December (pp 797-876)**
- EEMUA recommendations for the design and construction of refrigerated liquefied gas storage tanks  
J. de Wit 800-804
- Design of inner containment tanks for liquid oxygen and liquid nitrogen  
W.H. Aitken and P.H. Hanish 805-809
- Developments in the safe design of LNG Tanks  
N.J. Fulford and M.D. Slatter 810-817
- BCGA Code of Practice for liquid oxygen storage at users premises: a review  
M. Dennehy 818-822
- Problems due to superheating of cryogenic liquids  
B.A. Hands 823-829
- Discussion on the Cryogenics Safety Manual  
J.L. Currie 830-834
- Use of quantified risk assessment techniques in relation to major hazard installations  
M.J. Elliott 835-837
- Cryogenic spill protection and mitigation  
J. Moorhouse and P. Roberts 838-846
- Ethylene from Scotland  
D. Rosen 847-852
- Safe transport of cryogenic liquid by road  
C.J. Blades 853-855
